

High quality Polyester fibre filled pads. Manufactured using a top grade polyester fibre interior with a corvin cover.

High quality Polyester fibre filled pads

Available in any size or shape

Exclusive Fibre Filled

High quality Polyester fibre filled pads. These scatter pads are manufactured using a top grade polyester fibre interior with a corvin cover. They are well filled and while not as durable as our loose filled latex pads they do offer a good low cost alternative.

Lightweight and easy to handle

These pads are also much lighter in weight than our loose filled latex pads making them much easier to handle, we also recommend these pads when ordering Scatter cushions inner pads for outdoor applications.

Polyester Fibre

Fibre cushions are made of a man made polyester hollow strands which are pumped full of air. The aerated hollow strands are blown into a cushion casing giving a plump appearance.

The fibres compress with pressure providing a much softer sit than foam. As the air is expelled from the casing during use, the cushions will need plumping to return air back into the fibres.

POPULAR SIZES	PRICE
14" x 14" (35.5cm x 35.5cm)	3.50
16" x 16" (40.5cm x 40.5cm)	4.50
