

## Traditional Latex

Traditional Talalay latex is the most comfortable cushion filling available. Reassuringly expensive, a long term investment in durability and sumptuous comfort. Popular with customers who love their sofas and chairs and have no intention of replacing them. Traditional Talalay latex is no longer supplied by Dunlopillo and therefore only available from specialist suppliers with product knowledge and years of experience.

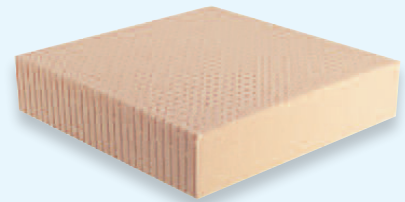

### Traditional Soft Latex

The ultimate replacement for feather and fibre cushions, allowing you to sink into the cushion while offering gentle support. Fully recovers after sitting, you will never have to plump up your cushions again!

### Traditional Medium Latex

Ideal for sofa and chair cushions of 5" or more, Medium Latex provides supreme comfort with a good level of support. The ultimate in luxurious seating!

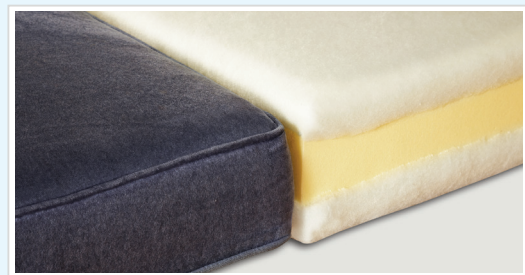

### Traditional Firm Latex

Offers excellent support with comfort. Due to its naturally heavy construction Firm Latex relies on density to give support. Therefore unlike a firm foam cushion that offers support but not necessarily comfort, firm Latex offers both comfort and support, giving you the best of both worlds.

Enhance the look of your seat cushions with Polyester Fibre Wraps

Polyester fibre being fitted to the top and bottom surface of a foam seat cushion.

Fitting Fibre Wraps achieves that plump cushion look.
