Firm or Extra Firm

**Traditional
Latex Mattress**
Available in Soft, Medium,
Firm or Layered

How to choose the perfect mattress...

First consider the quality required, this usually depends on whether the mattress is to be used on a regular or occasional basis and by whom. Make sure that the mattress you select is suitable for your bed base, i.e. ordering a 3" (7.5cm) soft mattress to go on a solid or slatted base would prove not suitable as the base would be felt through the mattress.

Consider the comfort level required. A well-built adult or a child may require a firm mattress. However as the child's weight is considerably less, even a medium mattress will feel firm. Always measure the bed, even standard beds do vary in size. If in doubt, please contact our **Advice line 0845 345 8101**.

Protect your new mattress..

A great mattress is an investment, ensure you protect that investment with a Foam for Comfort Mattress Protector. Available in any shape and size designed to fit any mattress.
